starfi

electronica

You're not supposed to understand the robot. It's a robot, it's not sentient, it doesn't make sense.
But for those of you that want to hear what the robot is saying, some the lyrics are below. By the way, the robot's name is Star.

Future Happening

Listen to me
It seems so hard to bring your lost heart back to me
I came here alone
I reach out and touch the future, long for home
I listen to space
I hear nothing but the silence crush this place
There's no escape
It's too far to leap the void and journey home

Is it true
Did I hear you left and try to search for me
Can it be true
I got so far that now I've lost my mind you see
It can't be true
I don't know how I reached this place so far from you
Please rescue me
I look across the sky and fear how long you'll be

I wish the future, was happening now
I wish the future, would happen now

I will hold on for ever
And then for the future

Motion Sonics

Slow motion sonics
One frame in the groove
Slow capture sonics
Learn the way we move

Feel my forced control
Program my future release
Set my thought response
Remove my inner peace

Newt

I think that you're worth living for
I think that you're worth living for
I think that you're worth fighting for
I think that you're worth dying for

Mars Temple

...I'll take you to Mars Temple,
Wonder at the things I see...

Earthrise

I'm waiting for you,
I'm heading for the sunshine.
I waited for you...

For Liz and Eva

Thanks to Chris, Paul, Giss & Garry
